STRATEGIC ADVISORY SERVICES BY

Odyssey Partners Consulting

Align IT strategies, processes, and governance to overcome
business challenges and achieve sustainable growth.

Enterprise Process Mapping

Facing inefficiencies in your business operations? Ensure your processes are supported by the right software solutions before making costly investments.

Enterprise Process Mapping creates actionable plans to streamline processes and align them with suitable software.

Business Challenges:
- Inefficient or redundant processes hindering productivity
- Mismatch between processes and software capabilities
- Difficulties in process documentation and improvement

Who Benefits:
- Operational leaders seeking optimized workflows and processes
- Teams preparing for significant software or system investments

Enterprise Process Mapping Offers:
- Documentation of current processes with gap analysis
- Roadmaps for process improvement and software integration
- Governance structures for continuous process enhancements

Engagement typically lasts **9 weeks**, including detailed process assessments and improvement planning.

Lets Work Together

1 — **Schedule a Consultation**

Contact us to schedule an initial consultation where we can discuss your specific needs and goals.

2 — **Stakeholder Meeting**

We will set up a meeting with your key stakeholders to kick off the Discovery Phase.

3 — **Proposal Submission**

Based on our initial discussions, we will submit a detailed proposal outlining our approach, timeline, and pricing.

4 — **Project Kickoff**

Once the proposal is approved, we will initiate the project and begin the Discovery Phase.

5 — **Continuous Collaboration**

We will work closely with your team throughout the engagement to ensure that the project meets expectations and delivers value.
